1. Receipt is acknowledged of a preliminary amendment filed August 1, 2006, and a prior art information disclosure statement filed May 23, 2005.

2. Claims 1-20 are now pending in this application.

3. This application contains claims directed to the following patentably distinct species:

Whereby the process is drawn for preparing a N alpha -acyl-L-arginine ester having the formula as noted in Claims 1, 14 and 19 and

A. R selected from one of the following

B whereby n is selected from

- a. 0;
- b. 1, 2 or 4;
- c. 3.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 14 and 19 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

It is noted that all of the independent claims are drawn to the preparation of an N alpha-acyl L-arginine ester and any election of species election must be within the scope of the preamble.

4. It is noted that the following may be rejected in the first office action based on the merits:

a. Claim 1 "starting reactants of appropriate organic acid and alcohol" under 35 USC 112 first and second paragraph;

Art Unit: 1657

b. Claims 14 and 19 "derived from fatty acids and esterified dibasic amino acids according to the following formula" under 35 USC 112 first and second paragraph;

c. the expression in claims 7, 14 and 19 "and other substituted celluloses" in view of the expression "cellulose esters" under 35 USC 112 second paragraph.

In addition, a claimed process limited to N alpha -acyl-L-arginine ester absent any new art will be allowable upon the cancellation of Claim 1 drawn to the appropriate species election with the cancellation of all other species.

5. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

6.
